nView desktop management software provides:

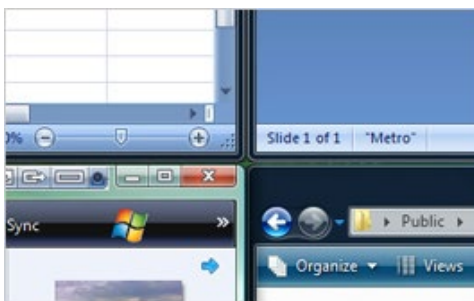

- Intuitive interface for easy display management
- Customizable desktop by various usage models
- Robust IT management tools for easy deployment and maintenance
- Tested compatibility with industry-leading business applications
- Proven stability — over millions of enterprise installations

KEY FEATURES

VIRTUAL DESKTOPS

Eliminate application clutter by creating, customizing, and seamlessly switching between different desktops you create.

DISPLAY GRIDLINES

Maximize your desktop by dividing the display into multiple regions.

USER PROFILES

IT Managers can deploy different desktop environments based on individual department requirements across the enterprise.

EXTENDED TASKBAR

See each application button on its specific display, eliminating a single screen with an overly crowded taskbar.
